ONLINE SAFETY

The police is there with you but you can do a lot for ensuring children are safe online

🙂 Make a family agreement about all online activity at home: what is to be seen, when, where and when not, and how much. Do family screen time by seeing films, news, sports, educational programmes and online serials together to bond with your children

🙂 Ensure that children see age-appropriate content. Guide them to such sites. Create separate profiles for them to oversee their online activity.

🙂 Build trust by conversing with your child about good and bad online experiences. Explain social media norms. Teach the child to identify and inform you immediately about online stalking, grooming and bullying.
