

RETINOPATHY OF PREMATURITY (RoP)

One of the leading Cause of Blindness in Children

— Screening for: —

- All Preterm Babies < 34-weeks
- Weight less than 2000 gms
- Sick newborns with risk factors

Timing of Screening:

- First screening at **3-4 weeks** of birth by Ophthalmologist
- Periodic evaluation of retina till 45 weeks

Treatment As Soon As Possible

- 90% infants with mild RoP - No treatment required
- Others may need Laser Therapy/Anti - VEGF Therapy (Injection)
